REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art made of record has failed to suggest either singly or in combination a novel connector guiding and holding jig. The applicant has disclosed a flexible connector mounted between a case body and a pull out unit in the body for retraction and extension, the guide consisting of a first and second links, having pin holes at their both ends, a hinge member having pin holes, holding frames for supporting the flexible connector removeably attached to the hinge member and links; the holding frames bend the flexible connector while the links and hinge are articulated during retraction and extension of the pull-out unit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to further show the state of the art with respect to Guiding and holding jig for a flexible connector: U.S Pat. No. 6142590, 6349534, 6065278, 6425238, 5169233, 6029437, 4625936, 4009919, 4625507, 5460441, 4462565, 5649415.
